The "Tool Box"

2011. What will it bring we ask? Nobody knows for sure but we face it in the confidence that the Lord will direct our ways.

We at Speed Wrench have experienced this direction in a very real way this past year. We entered the new year with a certain amount of fear and trepidation not knowing what the economy held in store. Looking back we stand amazed again at the Lord's goodness in 2010. He led us by giving us work for the day, every day and ultimately a successful year. Praise be to Him!

Many of the new ventures we started in 2010 have had a chance to develop and gain traction. You, our customer, have let it be known that you appreciate these new offerings. Thank you for your input and encouragement. You are the ones who help by suggesting new services and ideas. We cannot honor all of them, but we will ALWAYS look at those ideas that will enhance our services to you. OUR business is to help make YOUR business successful! We can help by maintaining your vehicles and equipment properly while you concentrate on growing your business. We are excited about continuing that relationship in 2011. Thank you!

~ The Management

WE DO IT RIGHT... RIGHT NOW!

Light Duty/RV Division

We welcome our latest new hire, Justin Hyma. He comes to us as a technician trainee and is looking to attend college at Ohio Tech next year. **Welcome Justin!**

Justin Hyma

Light Duty continues to expand their offerings as well. We have become quite involved in specialty transportation vehicles for people with disabilities. We offer not only the repair of the vehicles, but also the wheel chair lifts and accessories associated with it. Because of our mobile capabilities, we can offer this over a wide geographical area. We currently cover all of West Michigan and are expanding into Central and Northern Michigan as well.

If you have this kind of equipment and are looking for a service provider that can handle your complete vehicle and equipment needs, call 616-669-8777 and ask for Tom or Scott.

Repairing wheel chair lift on bus.

Body Shop Division

With our first year of operation in our collision department behind us, we are pleased to report it has been a huge success! We have added an additional service tech, Adam Kilbourn, to that department. **Welcome Adam!**

Adam Kilbourn

We have expanded our bus repair business into 23 Michigan school districts and hope to increase this in 2011. In times of uncertainty and cost cutting, our goal at Speed Wrench is to assist our public and private school districts in maintaining cost on their buses as they continue to operate them longer. With budgets tight, it is even more important that these buses continue to be maintained and cared for as new buses are not being purchased as often. We would like to thank you for your patronage and ask that you call us if you need any assistance in this arena. Call (616) 669-8777 and ask for Tom or Greg. Thanks!

Spray painting a bus.

Heavy Duty Division

We hired a new employee, Jake Korolewicz; he comes to us from Weller Truck and he also did some time at Valley Truck Parts. He graduated from Coopersville Public and Wyotech Diesel school. **Welcome Jake!**

Jake Korolewicz

We have updated the Beeline Alignment equipment to offer the latest equipment and software to ensure you of the best results possible. Call Chris with your alignment needs at (616) 669-8700.

Jerry has been working with an ethanol fuel supplement system for use in light and heavy duty trucks. We are working in tandem with a local company who produces the Ethanol to find the best and most efficient injection system for diesel engines. Some of the advantages to using this in a diesel application is, that it lowers engine exhaust temperatures and lower emissions, something the industry is working hard at with new government regulations coming into affect. We are currently in the development stages of this and will bring you more details as it progresses.

We are also keeping our attention focused on electric hybrid trucks which are making inroads into the delivery truck industry at a surprising rate. Speed Wrench continues to school our people so we are ready to face the next generation of vehicles.

All Phase Hydraulics & Machine

We at the All Phase Hydraulics Division have had a busy year! Not only have we had a full steady workload this year, but we have also had growing pains. The result of which has allowed us to hire three new employees this year. Brent Overway was hired in March as a parts runner primarily for the eastern side of the state. In August, we hired Tom Boorsma Jr. to work on the bench as cylinder technician. Finally, we would like to welcome Jon Swiler who was hired in as a salesman. Jon's territory includes primarily the central part of the state. If you have any hydraulic needs in that part of the state, give him a call at (517) 348-6795.

Don't Ignore Your Costs...Reduce them!

Speed-Tech Equipment has the solution...a Trash Monitor System.

This system is designed to reduce your waste removal costs, automatically schedule the waste hauling, and easily manage this all from your computer. More details below...

- Puts you in control of your waste stream and manage your trash flow from your desk top.
- Can operate via phone line or wireless
- This device monitors compactor strokes, pressure, hauling and cycling history, and sends email alert (up to four email addresses) when container is full
- It also automatically emails or faxes the hauler when the container is full - hauler then sends customer notification of pickup
- Eliminates human error of forgetting to schedule a haul when container is near full
- Saves customer money on reduced tips

Speed-Tech's New Offering!

We are pleased to offer a new location and service options to our valued customers in north central and north western Michigan. Effective January 1, 2011, we have opened a satellite office in Manton, Michigan. We have greatly increased our client base in the northern and central area with Compactor, Baler, and Loading Dock services.

As we continue to grow in these services, we want to be able to offer local hydraulic and custom machine repair/build options as well. Please contact Steve Ressler (231) 218-8217 or Bill Haagsma (231) 747-3946. We are ready to take care of your machining and hydraulic needs.

Hydraulic Repairs:

- 1) Repairs or rebuilds can be done more efficiently
- 2) Design and manufacturing for special bushings or glands
- 3) Local contact point for urgent or rush jobs where customers can have the ability to 'put their hands on' the product or service.
- 4) Expedient turn-around time
- 5) Customers can call and schedule with local representation

9360 East 14 ¼ Rd, Manton, MI 49663

Machine Repairs:

- 1) Local design and manufacturing point for specialty parts, weldments, fixtures and bushings
- 2) No 'lost in translation' issues when dealing with our experienced staff
- 3) Customers can call and schedule direct with facility personnel
- 4) Certified mobile welder

Pictured are some of the team photos of the Manistee Manufacturers Annual Golf outing at the Manistee National Golf Course. The outing was well organized and a Great time was had by ALL!
